

a Paired bridge geometry

b Exact geometric decomposition

c Shared three-head parameterization

d Supervision fixes the meaning

	Sample-compatible Paired sample labels	Geometry-aligned Projection + decoder labels
m^*	$\tilde{\mu}$	p
u^*	$(\tilde{\mu} - \bar{x}_0)/f_t$	$(p - r)/f_t$
C_θ^*	0	$(r - \bar{x}_0)/f_t$

$\tilde{\mu} = \mathbb{E}[\mu_t | X_t, t, C_{\text{obs}}]$

Same optimal total; different component targets.
